SDF-28S

0,

The graph illustrates the relationship between frequency (KHz) and wavelength (m). The x-axis (wavelength) is logarithmic, ranging from 1 to 1000 meters. The y-axis (frequency) is logarithmic, ranging from 0.001 to 1000 KHz. A diagonal line represents the relationship between frequency and wavelength. Key points marked on the line include:

- 200KHz at 1.5m
- 5° at 30m
- 0.3-600m at 300m
- 30 at 10m
- 14 at 2.1m
- 0.01 at 3000m

A shaded region is present in the bottom right corner of the graph.
